

Attention Grade 10 Geography learners

Please take note of the work you're supposed to do as you're at home until further notice

As you know we're supposed to start on the new topic (PLATE TECTONICS) here is what you should do;

From your textbook :

1. Read from page 176-178(plate tectonics) and do the classroom activity 5 in page 178
2. Continue from page 178-180 (evidence for the movement of continents over time) and do classroom activity 6 in page 180(only answer number 1 from a-e
3. Read From page 180(plate tectonics- an explanation for the movement of continents)and do the classroom activity 7 in page 181
4. On page 182(the mechanics of plate movement), read through the topic and do homework activity 3 in page 183
5. Read page 183-185(processes and landforms associated with different kinds of plate boundaries)and do classroom activity 9 in page 186
6. Lastly , from page 186(when a continental plate collided with the ocean floor)read up to page 188 and do classroom activity 10 on page 188
